

EXHIBITION Sculpture - from wax to bronze

OPENING 5:30pm Friday 13 March

This exhibit reflects the bronze sculpture artwork produced & also shows the ancient art of 'lost wax' metal casting that was undertaken at Creative Space & eastcapeArt workshops in 2008, led by Remo Williams.

This unique collaborative project offered Gisborne's arts community the opportunity to work with master foundryman and recognised accomplished NZ sculptor, Russell Evenson from Hawke's Bay.

The participating artists were able to explore this medium & learn many skills involved; from the manipulation of wax through to the bronze or patina finishes applied at the final stages.

The additional aim of this project was to bring accomplished & leading artists to work together with inexperienced individuals or emerging creative talent from our local community. This has generated enormous potential for creative growth & future development for building Gisborne's own Bronze-casting facility & community studio resources in the future.

Collaborative Arts Project & Gallery Exhibition is supported by: Gisborne District Council - Community Development Dept, Creative Communities Tairawhiti, Eastcape Art, RealPeople@CreativeSpace -Tairawhiti Community Art Studio, & Family Works.
